

Precision Dust Removal · Spotless, Residue-Free Cleaning

Dust Removal Stick

Made with a special adhesive resin elastomer tip for effective dust removal without leaving residue or marks. The plastic shaft is suitable for cleanroom use and ideal for cleaning industrial glass and optical lenses.

High-Efficiency Dust Removal

Excellent adhesion quickly removes fine surface particles.

Leaves No Adhesive Residue

Suitable for Lenses and High-Transmittance Industrial Glass

Suitable for Cleanroom Use

Plastic shaft designed to meet high-cleanliness requirements.

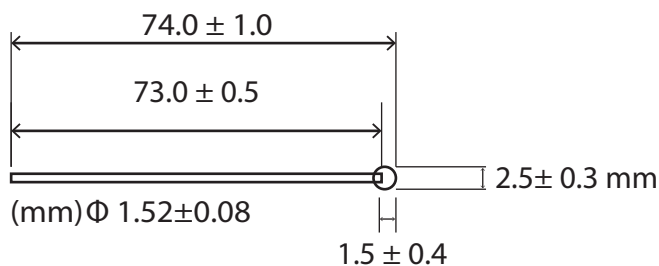

Precision Cleaning

Ideal for Optical Components and Precision Surfaces

Model No. : DRS - 25 Product Structure / Specifications

- 20 PCS / PKG
- MOQ : 25 PKG

Enlarged View

Transparent, flexible tip gently conforms to surfaces. High adhesion effectively removes fine dust without leaving residue.
